DETAILED ACTION

Response to Amendment/Arguments

1. This Office Action is in response to the Response/Amendment filed on October 26th, 2005. Claims 1-25 are now canceled and new claims 26-46 are added. Claims 26-46 are now pending in the application.

Allowable Subject Matter

2. Claims 26-46 are allowed. The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose the method in the wireless network for receiving data packets wherein each data packet including a media access control (MAC) address and a corresponding network protocol address for the originated access point and storing by the wireless unit, receiving information from a second access point, and especially, based on the information, determining by the wireless unit that the second access point is part of the second sub-network prior to the wireless unit associating with the second access point, as recited in claim 26.

Regarding claims 37 and 43, the prior art of record also fails to show the wireless unit (claim 37) and system (claim 43); with the wireless transceiver; memory and the logic circuit for performing method as the same manner set forth in claim 1.

Substantially regarding claim 46, the prior art of record also fails to show the method for receiving data packets in the wireless network as the same manner set forth in claim 1, especially with the addition method of comparing a MAC address of the second access point with MAC addresses stored by the wireless unit prior to the wireless unit associating with the second access point.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
